B.Tech Information Technology student focused on Cybersecurity, Networking, and Software Development, with hands-on experience building practical technical and security-focused projects.

EDUCATION

Chennai Institute of Technology

Bachelor of Technology in Information Technology

CGPA: 7.4/10

Sep. 2025 – Aug. 2029

EXPERIENCE

Cyber Security Intern

Jun. 2026

Amroha Police Cyber Security Internship Program (APCSIP-2026)

- Completed the Amroha Police Cyber Security Internship Program 2026, gaining practical exposure to cybersecurity and cybercrime investigation.
- Learned fundamentals of cybercrime investigation, digital forensics, cyber awareness, and security practices through technical sessions and workshops.
- Collaborated with law-enforcement professionals, industry experts, and peers to understand real-world cybersecurity challenges.

Ethical Hacking Intern

Jan. 2026 – Mar. 2026

EduSkills Academy – AICTE Virtual Internship

- Completed a 10-week Ethical Hacking internship covering cybersecurity fundamentals, ethical hacking, networking, and secure communication.
- Performed basic vulnerability assessment and web application penetration testing using Kali Linux and security testing tools.
- Studied social engineering, malware analysis, network security, and common web application vulnerabilities through structured assessments and practical exercises.
- Completed a capstone project demonstrating practical application of cybersecurity and ethical hacking concepts.

PROJECTS

Tracex — Digital Forensics & Evidence Intelligence Prototype

Aug. 2026

Hackathon Project · React · TypeScript · Leaflet · Data Visualization

- Built a prototype digital-forensics workspace for organizing and visualizing digital evidence, entities, investigation timelines, and relationships.
- Implemented interactive entity-link analysis, geospatial mapping, chronological event visualization, and evidence verification concepts.
- Designed a unified investigation dashboard to demonstrate how digital evidence and related entities could be explored during forensic investigations.

Network Analyser — Network Device Monitoring & Discovery Platform

Jul. 2026 - Sep. 2026

- Built a real-time network monitoring platform using Java/Spring Boot and PostgreSQL for device discovery, health monitoring, and performance analysis.
- Implemented ICMP/TCP monitoring, subnet discovery, Nmap scanning, SNMP hardware metrics, automated health alerts, and real-time WebSocket updates.
- Containerized the application with Docker and developed REST APIs with automated JUnit/Mockito testing.

GitQuest — Gamified Interactive Git Learning Platform

Aug. 2026

- Developed an interactive Git learning platform using React, TypeScript, and Supabase with a 20-chapter progression-based curriculum.
- Built a simulated Git terminal, live SVG commit-graph visualizer, branching/conflict exercises, authentication, cloud progress synchronization, and gamification features.
- Integrated an AI-powered Git tutor to provide context-aware hints and explanations throughout the learning experience.

SKILLS

Programming: C, C++, Java, Python, JavaScript, TypeScript

Web Development: HTML, CSS, React, Node.js, Spring Boot, REST APIs

Cybersecurity & Networking: Linux, Nmap, Wireshark, Burp Suite

Databases: PostgreSQL, MySQL, MongoDB

Tools & Technologies: Git, GitHub, Docker, Supabase, VS Code

ACHIEVEMENTS

- LeetCode Solved & Contest Rating:** 250 & 1555
- Top 20 in CTF, CyberStrike'26
- Top 60 in CTF, Into The Void
